EDUCATION

Bachelor of Science, Information Systems and Operations Management

Robert H. Smith School of Business, Class of 2012

University of Maryland, College Park

PREVIOUS WORK

Deloitte Consulting: Fall 2012 - Present

- Designed, built, and deployed Semoss, a custom analytics platform to enable the Military Health Systems rationalize a billion dollar portfolio.
- Created multiple data visualizations using D3.js that were reusable and integrated into Semoss.
- Wire-framed, designed, and presented countless user interface elements and flows.
- Developed high performing Angular.js applications and set up workflow optimizing tools.

Network Solutions: Summer 2011

- Designed and developed a web and mobile application that enabled small businesses to easily create and distribute feedback campaigns.
- Directed the product vision, while presenting updates and design decisions to management and executive leadership.

Seva Call: Summer 2009 - Summer 2012

- Managed design interns and worked with Web and Mobile Developers to create a professional website, brand identity, and mobile application.
- Mocked, polished, and articulated design decisions to founders who raised 1.3 million in funding using my designs.
